

# SAP Security Solution Rating

## Identify the Best Security Solution for You

### Get in Touch

To improve your security defenses, you must first learn to see your risk and vulnerabilities through the lens of the SAP landscape. We can show you how to do that. Are you ready?

The SAP Security Solution Evaluation supports organizations in identifying solutions and qualify their vendors regarding their capabilities to assist organizations in increasing their SAP security posture.

### What You Can Expect

To determine which solutions and vendors are the most suitable for implementing an SAP security strategy, NO MONKEY ADVISORY:

- Evaluates your requirements and resources in a requirements engineering workshop.
- Creates and issues RFI/RFQ's for you.
- Evaluates the responses.

To create an unbiased and transparent rating of vendors and tools, the capabilities, maturity, and cost of ownership are rated by independent experts. This minimizes the risk for dissatisfaction and internal procurement and evaluation efforts. As a result of the service, a report is created to compare the solutions and vendor's gear towards their test results, requirements coverage, cost of ownership, and implementation cost.
